

# About FoodShare

Bridging the gap between food surplus and food insecurity through technology and community collaboration.

## Our Mission

FoodShare was created to address two critical challenges facing our communities: massive food waste and widespread hunger. Every day, restaurants, grocery stores, and bakeries discard tons of perfectly edible food, while millions of people struggle to get their next meal.

Our platform connects food donors directly with NGOs and charitable organizations, making it simple and efficient to redirect surplus food to those who need it most.
